

## 2015 Physician Quality Reporting System Qualified Clinical Data Registries

CMS is pleased to announce the Qualified Clinical Data Registries (QCDRs) that will be able to report quality measure data to CMS, on behalf of individual eligible professionals (EPs) for the 2015 Physician Quality Reporting System (PQRS) program year (PY). These entities have self-nominated and indicated that they meet the requirements as outlined by CMS in the 2015 Medicare Physician Fee Schedule (MPFS) final rule. In addition to PQRS, the data submitted by QCDRs may also be used by the Value-based Payment Modifier and EHR Incentive Program. QCDRs must be considered Certified Electronic Health Record Technology (CEHRT) to allow their EPs to receive credit for the Clinical Quality Measure (CQM) component of meaningful use for the EHR Incentive Program.

In the table below, each of the 2015 QCDRs have provided detailed information regarding the measures they support, the services they offer their clients, and the costs incurred by their clients. The QCDRs must support at least 9 measures covering 3 National Quality Strategy (NQS) domains and at least 2 outcome measures for at least 50 percent of an eligible professional's (EPs) patients. If the QCDR does not support 2 outcome measures, then the QCDR must have and report at least 1 outcome measure and 1 of the following other types of measure: 1 resource use, OR patient experience of care, OR efficiency appropriate use, OR patient safety measure.\*

Additional information, including QCDR reporting details and the steps an EP should take in selecting a QCDR can be found in the 2015 PQRS QCDR Participation Made Simple on the [Qualified Clinical Data Registry Reporting](#) section of the [CMS PQRS website](#). EPs wishing to participate in 2015 PQRS through a QCDR, may contact the entities listed below for additional details.

*Disclaimer: Each QCDR has reviewed their organization's information below and provided confirmation of accuracy. Information included in this document was accurate at the time posting; however CMS cannot guarantee that these services will be available or that the QCDR will be successful uploading their files during the submission period. CMS cannot guarantee an eligible professionals success in providing data for the program. Successful submission is contingent upon following the PQRS program requirements, timeliness, quality, and accuracy of the eligible professionals data provided for reporting, and the timeliness, quality, and accuracy of the XML programming of the QCDR.*

NCDR hospital participants receive confidential benchmark reports that include access to measure macro specifications and micro specifications, the eligible patient population, exclusions, and model variables (when applicable). In addition to hospital sites, NCDR Analytic and Reporting Services provides consenting hospitals' aggregated data reports to interested federal and state regulatory agencies, multi-system provider groups, third-party payers, and other organizations that have an identified quality improvement initiative that supports NCDR-participating facilities. Lastly, the ACCF also allows for licensing of the measure specifications outside of the Registry for a fee of \$200 per physician per year.

Participating facilities can generate measure reports on-demand and can benchmark performance of physicians within the facility to one another and in comparison to the study as a whole. Data comes into the registry from electronic data capture or manual entry. Ten endoscopic report writers are currently certified with GIQuIC. GIQuIC is an approved Qualified Clinical Data Registry (QCDR). GIQuIC will report select colonoscopy and EGD measures to CMS for physicians who opt to use GIQuIC for this PQRS reporting option. The GIQuIC website is located at <a href="http://www.GIQuIC.org">http://www.GIQuIC.org</a> .  <b>Cost:</b> There will be no additional fees beyond existing subscription rates for GIQuIC registry participants to use GIQuIC for measure reporting to CMS.

This registry effort will uniquely bring actionable perspective of the patient to the physicians and care providers enrolled in this effort. This QCDR is structured around a powerful data collection and analytics platform designed to provide clinicians with actionable data about the patient experience in near real-time. The underlying Bivarus platform has transformed the data collection process using a novel but robust methodologic framework.  For EP’s practicing at clinical sites using the Bivarus platform, there is a nominal charge of \$100 annually for using the SAPE QCDR to submit the SAPE data elements to CMS.

---

<sup>i</sup> QCDRs, using Certified Electronic Health Record Technology (CEHRT) that meets all of the certification criteria required for eQMs as required under the EHR Incentive Program, may submit eQM data for the purposes of meeting the eQM reporting component for the EHR Incentive Program. The product or module must be CEHRT for the eligible professional to satisfy the eQM component of meaningful use.

<sup>ii</sup> The *2015 Physician Quality Reporting System (PQRS) Measure Specifications Manual for Claims and Registry Reporting of Individual Measures* (<http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/PQRS/MeasuresCodes.html>) must be used to report individual measures.

<sup>iii</sup> Measures group only measures are the measures within a measures group that do not have a correlating individual measure within the individual measures. The *2015 Physician Quality Reporting System (PQRS) Measures Groups Specifications Manual* (<http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/PQRS/MeasuresCodes.html>) must be used for these measures group only measures.

<sup>iv</sup> The Group Practice Reporting Option (GPRO)/Accountable Care Organizations (ACO) Web Interface Narrative Measures are the measures defined for the web interface reporting option for GPROs and ACOs. The *2015 GPRO/ACO Web Interface Narrative Measure Specifications* ([http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/PQRS/GPRO\\_Web\\_Interface.html](http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/PQRS/GPRO_Web_Interface.html)) must be used for these GPRO/ACO web interface measures. Please note that GPRO's and ACOs who have select the web interface reporting option must report through the web interface and not a QCDR. While QCDRs are able to support the GPRO Web Interface Measures, they are **NOT** able to submit on behalf of a GPRO or ACO for the 2015 program year.

<sup>v</sup> Only the Electronic Clinical Quality Measures (eQMs) are able to be utilized for the EHR Incentive Program. The July 2014 version of the eQMs ([http://www.cms.gov/Regulations-and-Guidance/Legislation/EHRIncentivePrograms/eQM\\_Library.html](http://www.cms.gov/Regulations-and-Guidance/Legislation/EHRIncentivePrograms/eQM_Library.html)) must be used when supporting the EHR Incentive Program.
